

# JOIN AEROTECH.

Engineer a better future.

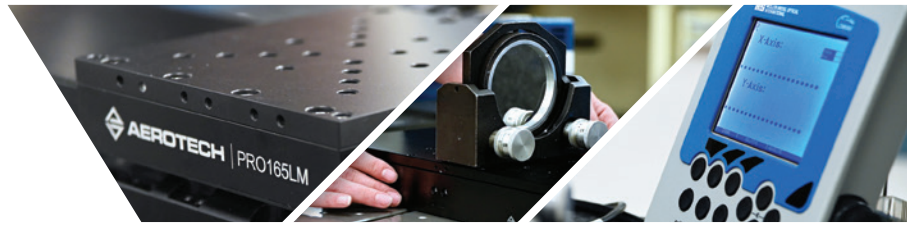

**Our products make amazing innovations—from live-saving medical devices to tools for deep space exploration—possible.**

Mechatronics Technicians bring our products to life, building, wiring and automating components so they move as a single finished system.

But we don't expect you to know how to do all that the minute you walk through our doors. Bring your skills, interest and drive to succeed, and we'll provide everything else you need to advance in this financially rewarding career.

## Benefits

We're a high-tech company that puts people first, investing in our employees with competitive salaries, benefits, profit sharing and our Employee Stock Ownership Plan.

## Mechatronics Technician Trainee

### Get Paid to Train

Our on-the-job training puts you on a financially rewarding career path. You'll have a full-time, paid position while we teach you precision manufacturing.

### Combine Coaching & Hands-on Learning

Put theory into practice, working directly with our experienced coaches and training materials.

### Use State-of-the-Art Equipment

Work with some of the most advanced technology and tools available—including additive manufacturing and laser marking equipment—as you assemble, wire and test motion systems.

### Advance & Earn More

Earn merit-based raises as you progress in the program. Most graduates complete the program as a Mechatronics Technician (Level 2) and are well prepared for advancement opportunities at Aerotech.

*Typical program length is 2 years, but it varies based on a candidate's skills, job knowledge, dedication and drive.*
