

Large Aperture Rotary Stage

ALAR-SP

High Load Capacity & Torque for Heavy-Duty Applications

The ALAR family of direct-drive, large-aperture rotary stages provides superior angular positioning and velocity control. ALAR-SP (standard profile) is the flagship of the ALAR product line. It offers a balance of high load capability, torque and profile height and is suitable for use in both vertical and horizontal applications. Featuring a large-diameter clear aperture and a non-cogging direct-drive motor, ALAR-SP stages offer a better-performing alternative to worm-gear stages.

Key Applications

ALAR-SP stages are best suited for applications including

- ◆ Single- and multi-axis sensor testing
- ◆ Inertial navigation device qualification
- ◆ Missile seeker testing
- ◆ Antenna testing
- ◆ Photonic component alignment
- ◆ High-accuracy laser processing
- ◆ Precision wafer inspection
- ◆ Custom gimbal assemblies

KEY FEATURES:

- ◆ Offers an **IDEAL BALANCE** of load capability, torque output & profile height, with large-diameter clear aperture up to 325 mm
- ◆ Supports **LARGE PAYLOADS** & gimbal configurations thanks to high axial-, radial- & moment-load capacities
- ◆ Delivers **EXTREMELY PRECISE**, high-torque, cog-free rotation with direct-drive motor
- ◆ **INTEGRATES EASILY** into multi-axis systems & machines
- ◆ Provides **LONG SERVICE LIFE** & consistent performance over time
- ◆ Available with absolute encoder option & limited travel for **MAXIMUM PAYLOAD SECURITY**

ALAR-SP SPECIFICATIONS

Mechanical Specifications	ALAR100SP	ALAR150SP	ALAR200SP
Travel	Continuous (optional 340° max. limited travel)

1. Resolution assumes 1 Vpp encoder with 2000x controller multiplication

2. Certified with each stage. Requires the use of an Aerotech controller.

3. Repeatability and accuracy are dependent on encoder selection. To achieve the listed specifications, the electrical resolution should be 0.2 arc sec or smaller.

4. Square-wave digital encoder options will limit maximum speed below the listed value. Contact factory for specific stage and encoder speed combination.

ALAR-SP ORDERING INFORMATION

ALAR-SP Mechanical-Bearing, Direct-Drive Rotary Stage

ALAR100SP	Mechanical-bearing, direct-drive rotary stage, 100 mm aperture
ALAR150SP	Mechanical-bearing, direct-drive rotary stage, 150 mm aperture
ALAR200SP	Mechanical-bearing, direct-drive rotary stage, 200 mm aperture
ALAR250SP	Mechanical-bearing, direct-drive rotary stage, 250 mm aperture
ALAR325SP	Mechanical-bearing, direct-drive rotary stage, 325 mm aperture

Motor (Required)

-M1	Standard motor
-M2	High-power motor

Motor options (-M1 and -M2) only apply to the ALAR250SP and ALAR325SP stages.

Travel (Required)

-	Continuous travel
-TR010	Limited travel, ± 5 degrees
-TR020	Limited travel, ± 10 degrees
-TR030	Limited travel, ± 15 degrees
-TR060	Limited travel, ± 30 degrees
-TR090	Limited travel, ± 45 degrees
-TR120	Limited travel, ± 60 degrees
-TR180	Limited travel, ± 90 degrees
-TR240	Limited travel, ± 120 degrees
-TR300	Limited travel, ± 150 degrees
-TR340	Limited travel, ± 170 degrees

Feedback (Required)

-E1	Incremental encoder, 1 Vpp
-E2	Incremental encoder, digital RS422, x4 interpolation
-E3	Incremental encoder, digital RS422, x20 interpolation
-E4	Incremental encoder, digital RS422, x40 interpolation
-E5	Incremental encoder, digital RS422, x100 interpolation
-E6	Incremental encoder, digital RS422, x200 interpolation
-E7	Absolute encoder

Integration (Required)

Aerotech offers both standard and custom integration services to help you get your system fully operational as quickly as possible. The following standard integration options are available for this system. Please consult Aerotech if you are unsure what level of integration is required, or if you desire custom integration support with your system.

- | | |
|-------------|--|
| -TAS | Integration - Test as system
Testing, integration, and documentation of a group of components as a complete system that will be used together (ex: drive, controller, and stage). This includes parameter file generation, system tuning, and documentation of the system configuration. |
| -TAC | Integration - Test as components
Testing and integration of individual items as discrete components that ship together. This is typically used for spare parts, replacement parts, or items that will not be used together. These components may or may not be part of a larger system. |
